

## GELLERT GLOBAL GROUP

New Jersey

### Lighting and Controls Upgrade

**Owner**

Atalanta

**Contract Type**

Lighting Upgrade

**Electrical Contractor**

Facility Solutions Group

### CHALLENGE

FSG has enjoyed a 9 year relationship with Atalanta and Gellert Group, dating back to our first retrofit of their flagship Elizabeth New Jersey facility from HID to high bay fluorescent in 2009. Atalanta has relied on FSG as a trusted adviser when it comes to updating lighting and controls in their facilities.

### SOLUTION

In 2009, FSG designed and implemented a project to update the warehouse lighting at One Atalanta Plaza from HID high bays to fluorescent high bays with sensors. Years later when an addition was being built, FSG supplied lighting fixtures for this expansion. Between 2016-2017 FSG again updated all of these interior and exterior lighting systems to LED. When Atalanta acquired a second Elizabeth location in 2013, FSG updated both exterior and interior lighting to new LED technology. In 2011 FSG upgraded lighting in the Tipico Lakewood NJ facility from HID to high efficiency fluorescent, and is currently bringing up the facility to the LED standard in 2018.

### RESULT

The lighting upgrades FSG has installed for Atalanta have saved the company millions of dollars in energy costs. By installing quality products with long warranties that are supported by FSG, Atalanta has also saved on ongoing maintenance as well.
