

UNT Football Stadium

Denton, TX

ELECTRICAL CONSTRUCTION CASE STUDY

Owner

University of North Texas

Contract Type

Electrical Construction

Contract Amount

\$7,995,000

General Contractor

Manhattan

FSG provided electrical construction for the University of North Texas football stadium.

Challenge

When the University of North Texas constructed their new football stadium, they turned to the Dallas branch of FSG for complete electrical construction.

Solution

This new football complex encompassed state-of-the-art LED lighting and controls throughout the facility. Two large video scoreboards were installed, as well. The multi-level stadium includes modern suites, dining, and press levels, in addition to two full-size visitors' locker rooms and an officials' locker room. Installation services included ground-up electrical service, as well as the interior and exterior lighting systems.
