

Signage - US Partners

San Antonio, TX

SIGNS / ELECTRICAL SERVICES CASE STUDY

FSG Provides Signage Installation Services for San Antonio Restaurant Franchise Owner

Challenge

San Antonio McDonald's franchisee US Partners decided to demolish an existing location and execute a ground-up construction project for a new restaurant at the location. For the iconic signage, US Partners contracted with Persona Signs. Upon delivery of the new signage, US Partners needed an electrical services contractor to install the new signage and commission each element. To complete this portion of the project work scope, US Partners turned to FSG's San Antonio branch.

Solution

FSG successfully installed and commissioned all new signage for the new US Partners restaurant location. All signage installation work was completed on schedule for the customer.

Result

FSG proved to be a reliable signage installation partner for US Partners. All signs for the newly-constructed restaurant location were installed and commissioned to the customer's ultimate satisfaction.
