

UV & GERMICIDAL LIGHTING SOLUTIONS

Reduce germs, microbes, and viruses with UV and visible lighting solutions. UV lighting can save you money, time, and energy while disinfecting and cleaning your facility.

Why Choose UV Lighting?

Commercial buildings have used UV lighting to promote healthier indoor environments for decades. Its power to sterilize has cleaned the drinking water of billions of people. Research laboratories operate powerful UV lights to clean germs from sensitive equipment. Hospitals and medical facilities use this technology to disinfect and decontaminate surfaces and tools. Now you can harness the power of UV and germicidal lighting for your facility, too. Contact us to learn more.

SPOT APPLICATION SOLUTIONS

Smaller, aesthetically pleasing fixtures perfect for disinfecting a specific area of your facility.

WHOLE FACILITY SOLUTIONS

Large-scale systems designed to treat an entire facility without being seen by the public.

MOBILE & TEMPORARY SOLUTIONS

Easy-to-use and portable solutions for hospitality, schools, law enforcement, offices, and more.

UV & GERMICIDAL LIGHTING SOLUTIONS

FAQS

IS UV LIGHTING EFFECTIVE AGAINST COVID-19?

According to the April 2020 Illuminating Engineering Society (IES) report, their answer is “yes,” UV lighting can effectively inactivate the COVID-19 virus under certain conditions. The most effective UV lighting for inactivating viruses is UV-C lighting..

WHICH TYPE OF UV LIGHT DO I NEED?

While UV-C lighting is ideal for inactivating viruses, UV-A and UV-B lighting are useful in killing bacteria. These solutions are particularly effective in health care facilities, pharmacies, and other areas where bacterial infection is a high-level and expensive concern. An FSG team member can help you determine which UV lighting technology is right for your needs

WHAT DOES UV LIGHTING COST? IS FINANCING AVAILABLE?

Governments, municipalities, schools, non-profits, small businesses, and more can take advantage of government funding from FEMA, the CARES Act, and other financing sources. Ask our team about how your organization can access grant funds and financing as low as 0% to support the installation of a UV lighting system.

NOT SURE WHICH SOLUTION IS RIGHT FOR YOU?

At FSG, we have a team of subject matter experts that can help guide you to the disinfection solution that is right for your facility. We have expert teams installing UV disinfection systems for school districts, commercial facilities, and more. If you're not sure which solution is right for you, we can help.
