Owner

Emerson Process Management HQ

Contract Type

A/V Design and Install

Contract Amount

\$218,500

Electrical Contractor

FSG

CHALLENGE

FSG was contracted to provide and install the audio/visual systems for Emerson Project Management's Regulator Technologies world headquarters in McKinney, Texas. This was a ground-up development and interior finish-out project for Emerson. FSG's work would cover some 128,000 square feet of office space and warehouses.

SOLUTION

The scope of this project would cover the following: auditorium, executive boardroom, conference rooms, lunch room, public spaces, fitness rooms, and a campus-wide paging system. The office spaces were equipped with Crestron control systems, both wired and wireless, along with multiple multimedia connections for PCs and laptops. In addition, recessed ceiling-mounted projection screens were installed, along with Epson high-brightness projectors and distributed ceiling speakers for audio reinforcement.
