Lighting Upgrade

Contract Amount

\$949,000

LIGHTING UPGRADE CASE STUDY

FSG upgraded over 11,000 fixtures throughout the Campus.

Challenge

Ranked as one of the top hospitals in the United States, HUH is the largest provider of inpatient and outpatient services in New Jersey. A leader in healthcare and technology, they chose to upgrade their lighting to the newest state of the art technologies. FSG upgraded over 11,000 fixtures throughout the campus.

Solution

Mechanical rooms, cove lighting, parking garages, and the atrium were upgraded with new LED lamps and retrofits. Many of the retrofits were high output LED screw-in fixtures. For example, in the parking garages, 175W metal halide lamps were replaced with 55W LED screw-in lamps. LED linear lamps were installed in coves, and a 93W LED retrofit lamp replaced a 400W metal halide in the 65-foot-high atrium.
